

Idea Companion

WHY I BUILT THIS

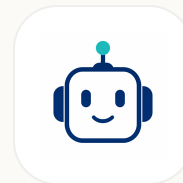

**Your best thinking happens in motion,
away from a keyboard.**

By the time you sit down, the idea is gone.

💡 a question worth chasing

💡 a connection you spotted

💡 gone

A loop that turns a conversation into a lesson you keep.

Notion becomes the brain of a personal AI that compounds everything you learn.

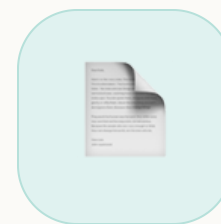

Speak

Talk to a tutor, hands-free, on a walk

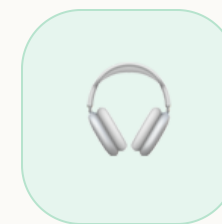

Notion captures

The walk becomes structured memory

A lesson builds

Concept cards, quiz, sources, images

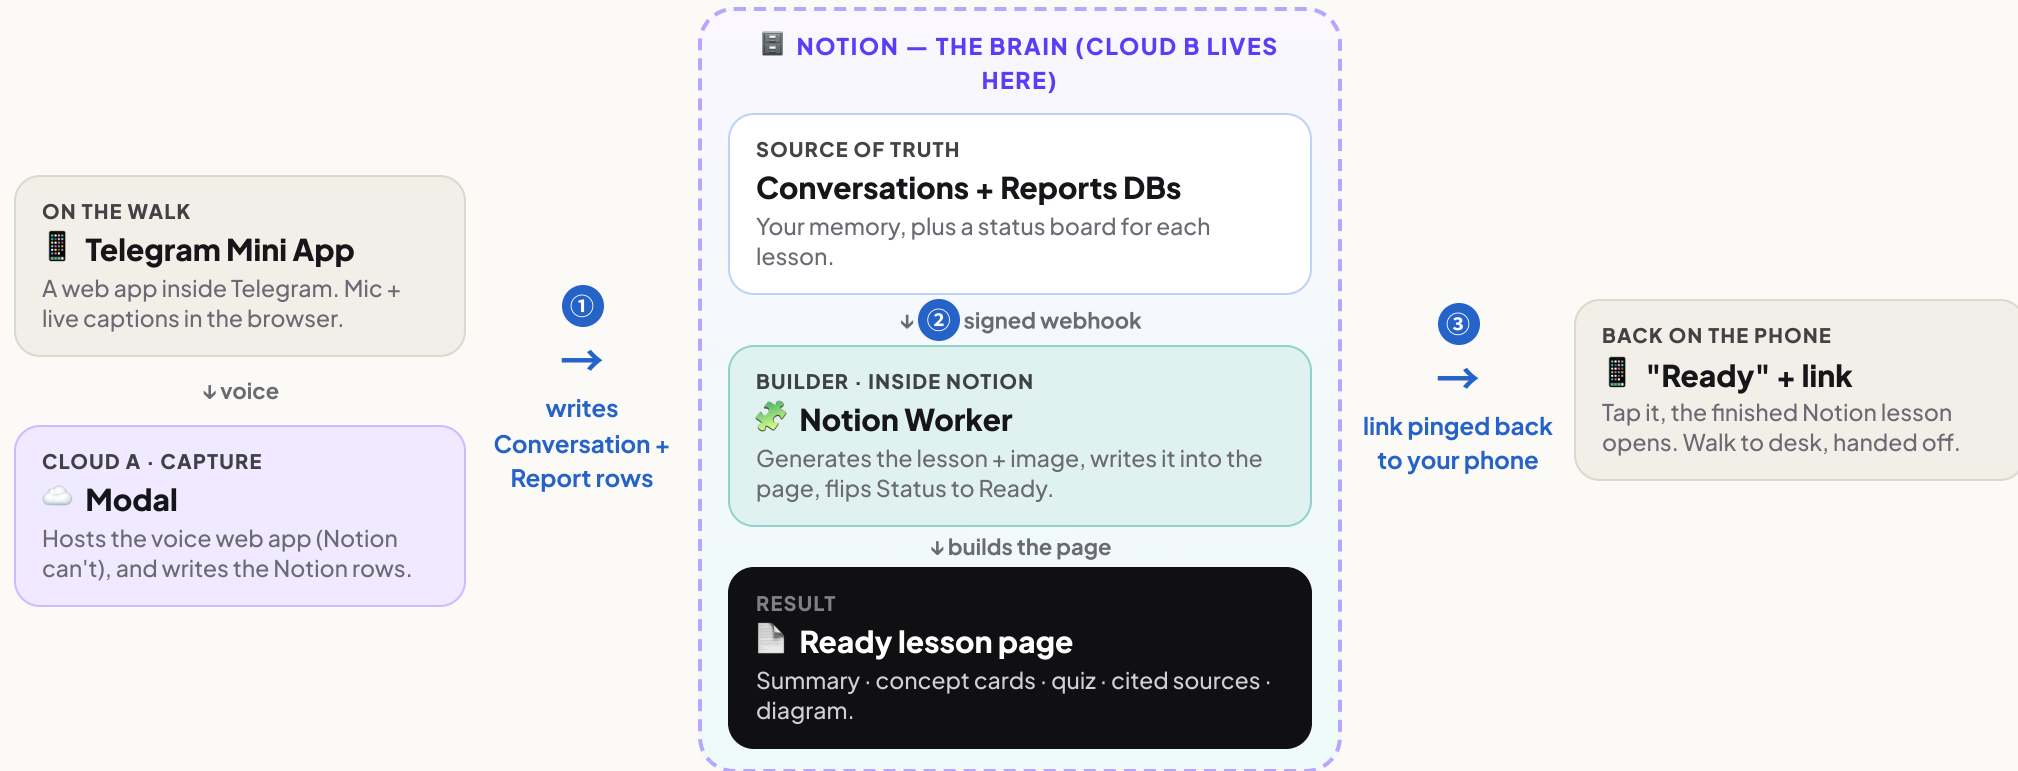

Study + ask

Read it, hear it, question it later

↻ Every loop compounds. Your knowledge gets deeper, not just longer.

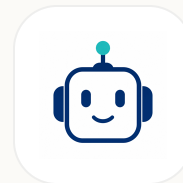

Two clouds, one Notion brain.

🧠 **OpenAI models feed in:** Realtime voice (the talk) · gpt-4o-search (current, cited reports) · gpt-image-1 (the diagram)

The report builder runs **inside Notion's own runtime**, so the learning system lives where your knowledge lives. **Notion is the product, not just storage.**

WHY IT'S DIFFERENT

Other voice bots answer and forget. This one is yours to keep.

Talk to ChatGPT, Claude, or Perplexity and the moment scrolls away inside their app. Idea Companion turns it into memory you own.

Portable, organized memory

Every walk becomes a structured Notion page you own, can organize, search, and take anywhere.

Other bots: your history is trapped in their app.

Auto-built, yet programmable

The lesson writes itself (summary, cards, quiz, sources, image), and because it is your Notion and your code, you decide how it is built.

Other bots: a fixed answer you can't reshape.

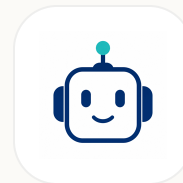

Model-agnostic and reusable

Swap in any model, and reuse the same memory across your other projects. Never locked to one vendor.

Other bots: locked to one company's model.

THE VISION

From a walk, to a week, to a lifetime.

Today it captures one walk. The same rails grow into a personal intelligence that knows your whole journey.

TODAY

✓ Live

The Walk

Capture and teach. One conversation becomes a lesson you keep.

NEXT

The Week

Everything you read, watched, coded, and learned, synthesized into a weekly review you listen to and question on a walk.

HORIZON

The Year

Cross-source insight: what you consumed shaped what you created. A coach that surfaces the right lesson before you need it.

THE VISION

A Lifetime

Your second brain: a personal AI that has learned your whole intellectual journey and compounds it, owned by you.

Most AI rents you intelligence. This one compounds yours.

Your data. Your keys. Your Notion. Growing with you, for life.
